## FACULTY OF BIOLOGY

### Animal Structure and Development

<b>Module code</b>	BIO 20701
<b>Module level</b>	1 <sup>st</sup> year of Undergraduate Program in Biology
<b>Abbreviation, if applicable</b>	-
<b>Sub-heading, if applicable</b>	-
<b>Courses included in the module, if applicable</b>	-
<b>Semester/term</b>	Even
<b>Module coordinator(s)</b>	Drs. Yohanes Sugiyanto, M.S.
<b>Lecture(s)</b>	<ol style="list-style-type: none"><li>1. Drs. Yohanes Sugiyanto, M.S.</li><li>2. Drs. Abdul Rachman, M.Si.</li><li>3. Susilohadi, S.Si., M.Si., Ph.D.</li><li>4. Dr. Bambang Retnoaji, M.Sc.</li><li>5. Zuliyati Rohmah, S.Si., M.Si., Ph.D.</li><li>6. Dr.med.vet. drh. Hendry T.S.S.G. Saragih, M.P.</li><li>7. Luthfi Nurhidayat, S.Si., M.Sc.</li></ol>
<b>Language</b>	Indonesia
<b>Classification within the Curriculum</b>	Compulsory
<b>Teaching format/class hours per week during the semester</b>	This course is organized into 3 classes and planned to have 14 teaching weeks and 2 weeks of examination.
<b>Workload</b>	Estimated working hour: 14 hours/week.
<b>Credit points</b>	3-1 credits
<b>Requirements</b>	General Biology (BIO 10001)
<b>Learning goals/competencies</b>	<ol style="list-style-type: none"><li><b>1. Knowledge and understanding</b> To understand the principal and theoretical basic concept of animals body structures, functions, and development.</li><li><b>2. Ability/intellectual skill</b><ol style="list-style-type: none"><li>a. Identify the position of system's organs and the connection to the other system's organs</li><li>b. Name the name of organs which connected to a body system.</li><li>c. Identify and name the cells or tissues which compound the organ and its functions.</li><li>d. Understand the phases of animal development.</li></ol></li></ol>

# THE MODULE HANDBOOK

## FACULTY OF BIOLOGY

	<p><b>3. Practical skill</b></p> <ol style="list-style-type: none"><li>Skillfully do macroscopic dissection.</li><li>Use the microscope to inspect the microscopy structure of organs.</li></ol> <p><b>4. Managerial and transferable skill</b></p> <ol style="list-style-type: none"><li>Do a scientific study research about animal structure and development</li><li>Either work individually or work in a team.</li></ol> <p><b>5. Attitude</b></p> <p>To use the basic knowledge of animal structure and development to do some researches about either macroscopic or microscopy structure and the development of animals; researches about animal physiology, animal systematics, etc.</p>
<b>Content</b>	<p>Animal Structure and Development is an introduction subject which give understanding about systems and symmetrical structure and body pattern of animals, body parts, four major tissues, basic histological structure of integument, muscles, skeletal system, digestive system, respiratory system, circulatory system, system of excretory and reproduction, nerve, endocrinal glands, sense organs and development phases (includes gametogenesis, fertilization, segmentation, blastulation, gastrulation, organogenesis and embryonic membrane), specially in Vertebrates.</p>
<b>Study/ exam achievements</b>	<ol style="list-style-type: none"><li>Theory<ol style="list-style-type: none"><li>Midterm: 40%</li><li>Final examination: 40%</li><li>Individual assignment: 15%</li><li>Quiz: 5%</li></ol></li><li>Laboratory work<ol style="list-style-type: none"><li>Preliminary test: 20%</li><li>Pretest: 10%</li><li>Drawing(s): 10%</li><li>Activity: 10%</li><li>Poster: 20%</li><li>Laboratory work examination: 30%</li></ol></li></ol>
<b>Forms of media</b>	<p>White board, LCD, notebook, video and animation, and specimen.</p>
<b>Literature</b>	<ol style="list-style-type: none"><li>FEDUCCIA, A. AND E. MC. CRADY. 1997: TOOREY'S MORPHOGENESIS OF THE VERTEBRATES. JOHN WILEY &amp; SONS. INC. NEW YORK</li><li>GILBERT, S.F. 1991: DEVELOPMENTAL BIOLOGY. THIRD EDITION. SINAUER ASSOCIATES, INC.PUBL. SUNDERLAND, MASSACHUSETTS.</li></ol>
